

JACKETED PIPE SECTION

GLASS JACKET

For heating of piping and for controlling the temperature throughout the column, the jacketed pipe section is provided. Glass jacket is sealed to the pipe section using Viton 'O' ring and other sealing compositions. The seal prevents impermissibly high expansion. Maximum operating pressure in the jacket:

DA80 - DN 150				1.0 bar		
DN 225 - DN 300				0.5 bar		
Cat. Ref.	DN	L	d	DN1	J	J1
